

STATE OF CALIFORNIA

CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

Base Year Modification Request Certification

Part 2: Generation Study - Includes Extrapolation of Residential or Non-Residential Diversion Data

To request a substitution for a previously approved base-year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

California Integrated Waste Management Board
Office of Local Assistance
1001 I Street, 9th Floor
PO Box 4025
Sacramento, CA 95812-4025

General Instructions:

Please select the ONE choice below that best explains your request to the Board.

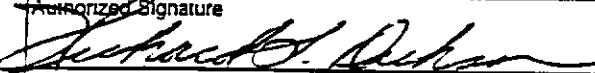

1. Use a recent generation-based study to calculate our current reporting-year generation amount, but not officially change our existing Board-approved base year.
 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative.

Section I: Jurisdiction Information and Certification

All respondents must complete this section.

I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:

Jurisdiction Name	County		
Colusa County Regional Agency	Colusa		
Authorized Signature	Title Deputy Director of Public Works		
			
Type/Print Name of Person Signing	Date	Phone ()	
Richard S. Dickson	11/14/2001	(530) 458-0466	
Person Completing This Form (please print or type)	Title Deputy Director of Public Works		
Richard S. Dickson			
Affiliation:	Colusa County Public Works		
Mailing Address	City	State	ZIP Code
1215 Market Street	Colusa	CA	95932
E-mail address	raicksan@colusanet.com		

Section II: Information for New Generation-Based Study for Existing or New Base Year

Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g., "4").

Note: New base years must be representative of a jurisdiction's disposal and diversion.

1. Current Board-approved existing base year:

1990

2. Proposed new generation-based study year:

1999

3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:

The disposal and diversion are typical year totals because there were not any anomalies.

4. Enter diversion rate information below.

Diversion rate calculated using existing base year	a. 43 %	Diversion rate calculated using new generation-based study	b. 68 %
For existing base year pounds/person/day based on generation	8.27	For new generation based study pounds/person/day based on generation	14.41
Residential generation 57 % Non-Residential generation 43 %		Residential generation 57% % Non-Residential generation 43% %	
Population existing generation-based study	16,585	Population new generation-based study	18,745

5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide any examples (e.g., change in jurisdiction's demographics).

Diversion tonnage from our 1999 generation study is based upon actual weights versus using an estimate to calculate diversion based upon our 1991 base year study. Therefore, the Colusa County Regional Agency (Agency) believes the diversion rate from our 1999 generation study is a more accurate indication of the diversion taking place in the County. The Agency has been conducting generation studies to calculate their annual diversion rates since 1995. The Agency has implemented the majority of their SRRE selected programs, and these diversion efforts are reflected in our diversion rate. The major diversion program for Colusa is the diversion of ash. The City of Colusa diverts 100% of the ash generated by the Wadham Energy Plant, located in the County, into concrete and soil amendment. Other contributing programs for the Agency are: Curbside recycling for waste subscribers in the City of Williams and Unincorporated

6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)

Diversion tonnage from our 1999 generation study is based upon actual weights versus using an estimate to calculate diversion based upon our 1991 base year study.

7. Disposal Tonnage (enter values):	9044	8822	15866
Please select the ONE choice below that best explains your disposal data and complete the required tables.	Residential	Non-Residential	Total
<input checked="" type="checkbox"/> a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)			
<input type="checkbox"/> b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Request and Modification Certification sheet found at www.ciwmib.ca.gov/LGCentral/Forms/rtnmdrq.doc)			
<input type="checkbox"/> c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at www.ciwmib.ca.gov/LGCentral/Forms/rtnmdrq.doc)			

8. In the table below, list the summarized diversion activities, and diversion data records that support your claim and are available for Board audit. **Note:** The Board expects the jurisdictions to be able to provide all back-up documentation, if requested. Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition calculations). If any diversion is from restricted wastes, agricultural wastes, inert solids [e.g., concrete, asphalt, dirt,] white goods, and scrap metal, please identify those programs/waste types and fill out Section 10. Please mark as Attachment 8 all copies of survey forms.

*Please provide detailed Non-Residential waste information in Section 9.

Ref. #	Source	Category	Type of Generator	Non Residential	Material type	Diversio n Activity	Weight (in tons)	Conversion factor and source (if the actual weight was used, please note that)	Quantification methodology used to calculate weight
1	Arbuckle Food Center	Generator	Commercial	Non Residential	Cardboard	Recycled	41.00 records	500 lbs per bale/shipping	164 * 500
2	Chung-Sun Market	Generator	Commercial	Non Residential	Cardboard	Recycled	34.00 records	500 lbs per bale/shipping	136 * 500
3	Holiday Market	Generator	Commercial	Non Residential	Cardboard	Recycled	100.00 records	500 lbs per bale/shipping	400 * 500
4	Import Dealer Service	Generator	Commercial	Non Residential	Cardboard	Recycled	9.00 from annual averages	actual weight/weights derived	large gaylord boxes
4	Import Dealer Service	Generator	Commercial	Non Residential	Scrap Metal	Recycled	72.00 from annual averages	actual weight/weights derived	import dealer receives motorcycles from overseas on large pallets. It is not economical to return to source.
4	Import Dealer Service	Generator	Commercial	Non Residential	Wood/Pallets	Recycled	120.00 from annual averages	500 lbs per bale/shipping	80 * 500
5	Maxwell Country Market	Generator	Commercial	Non Residential	Cardboard	Recycled	20.00 records	actual weights/manufacturers	
6	Pirelli Cable	Generator	Industrial	Non Residential	White Paper	Recycled	0.38 records	3000 boxes/manufacturers	
6	Pirelli Cable	Generator	Industrial	Non Residential	Cardboard	Recycled	37.50 records	2000 pallets/manufacturers	
6	Pirelli Cable	Generator	Industrial	Non Residential	Pallets	Reuse	60.00 pallets	records. Environmental Manager estimated that 50% of the pallets are reused and 50% are recycled. The company owns their own pallets.	2000 * 60 lbs per pallet. Many of the pallets have heavy hardwood lathes and center boards.
6	Pirelli Cable	Generator	Industrial	Non Residential	Aluminum	Recycled	316.60 Records	2000 pallets/manufacturers	
6	Pirelli Cable	Generator	Industrial	Non Residential	Copper	Recycled	442.22 Records	actual weight/Manufacturers	
7	Rite-Aid	Generator	Commercial	Non Residential	Cardboard	Recycled	8.50 records	500 lbs per bale/shipping	34 * 500
8	Shop N' Save	Generator	Commercial	Non Residential	Cardboard	Recycled	39.00 records	actual weight/sales records	156 * 500
9	Wadham Energy	Generator	Industrial	Non Residential	Ash	Recycled	31,564.61 electrical generator		32,924.81

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from largest to smallest, based on total diversion tons. Audit reference number ties to your audit sheets.

(Table will perform all addition calculations)

Also provide an attachment 9 which includes all of the generators surveyed. Include for each generator (use type of generator in lieu of specific business name) diversion activity and material type and associated tonnage for each diversion activity/material type, and applicable conversion factors/sources. Include copies of survey forms/surveys used.

Summarize the non-residential diversion activities for the top 10 generators quantification methodology, and applicable conversion factors and sources (e.g., cardboard recycling: quantified by monthly tonnage receipts provided by the contact person at the business).

Wadham Energy weighs all ash shipments that leave its plant. Pirelli Cable ships 4000 pallets per year back for reuse or recycling. Commercial recycling of cardboard is calculated using a per bale weight of 500 pounds. All generators are contacted on an annual basis to confirm continuing recycling programs and any additions. Cardboard from both Pirelli and Import Dealer Services are heavy multiple layer shipping boxes.

10. For each restricted waste type (i.e., agricultural waste, inert solids, [e.g. concreter, asphalt, dirt, etc.] scrap metals and white goods [PRC section 41781.2]) and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table.

Note: program name refers to one specific diversion program for that waste type (e.g., "Diversion conducted by city public waste dept.").

Restricted Waste Type	Specific Program Name	Year Started	Tonnage
Pull Down for Waste Types	▼		
Pull Down for Waste Types	▼		
Pull Down for Waste Types	▼		
Pull Down for Waste Types	▼		
Pull Down for Waste Types	▼		
Pull Down for Waste Types	▼		

b. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board - on a separate sheet marked "Attachment 10b", provide the documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (**Note:** this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2]). Please include documentation.
- That the jurisdiction is implementing, and will continue to implement, the diversion programs in its source reduction and recycling element.

Note: If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 10b for that waste type and program.

Instead please provide date of Board approval of previously submitted information.

(Date)

If documentation is not available, go to 10d.

c. If the diversion program started before January 1, 1990, and the documentation requested in 10b is available (but not yet approved by the Board), complete the table below for each program claimed:

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Diversion Tonnage
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	

d. If the diversion program started before January 1, 1990, and the documentation requested in 10b is not available, please complete the table below for each program claimed. **Note:** Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Tonnage	1990 Diversion Tonnage	Difference

Base Year Modification Request Certification

Part 2: Generation Study - Includes Extrapolation of Residential or Non-Residential Diversion Data

To request a substitution for a previously approved base-year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

California Integrated Waste Management Board
Office of Local Assistance
1001 I Street, 9th Floor
PO Box 4025
Sacramento, CA 95812-4025

General Instructions:

Please select the ONE choice below that best explains your request to the Board.

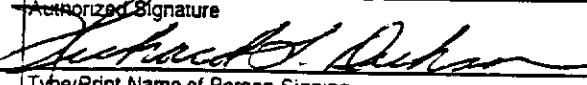

1. Use a recent generation-based study to calculate our current reporting-year generation amount, but not officially change our existing Board-approved base year.
 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative.

Section I: Jurisdiction Information and Certification

All respondents must complete this section.

I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:

Jurisdiction Name		County	
Colusa County Regional Agency		Colusa	
Authorized Signature		Title	Deputy Director of Public Works

Section II: Information for New Generation-Based Study for Existing or New Base Year

Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g., "4").

Note: New base years must be representative of a jurisdiction's disposal and diversion.

1. Current Board-approved existing base year:

1991

2. Proposed new generation-based study year:

2000

3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:

The disposal and diversion are typical year totals because there were not any anomalies.

4. Enter diversion rate information below.

Diversion rate calculated using existing base year	a. 22 %	Diversion rate calculated using new generation-based study	b. 63 %
For existing base year pounds/person/day based on generation	8.27	For new generation based study pounds/person/day based on generation	16.63
Residential generation 57 % Non-Residential generation 43 %		Residential generation 57% % Non-Residential generation 43% %	
Population existing generation-based study	16,585	Population new generation-based study	18,745

5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide any examples (e.g., change in jurisdiction's demographics).

Diversion tonnage from our 2000 generation study is based upon actual weights versus using an estimate to calculate diversion based upon our 1991 base year study. Therefore, the Colusa County Regional Agency (Agency) believes the diversion rate from our 2000 generation study is a more accurate indication of the diversion taking place in the County. The Agency has been conducting generation studies to calculate their annual diversion rates since 1995. The Agency has implemented the majority of their SRRE selected programs, and these diversion efforts are reflected in our diversion rate. The major diversion program for the Agency is the diversion of ash. The City of Colusa diverts 100% of the ash generated by the Wadham Energy Plant, located in the County, into concrete and soil amendment. Other contributing programs for the Agency are: Curbside recycling for waste subscribers in the City of Williams and Unincorporated

6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)

Diversion tonnage from our 2000 generation study is based upon actual weights versus using an estimate to calculate diversion based upon our 1991 base year study.

7. Disposal Tonnage (enter values):	12139	9157	Total	21296
Please select the ONE choice below that best explains your disposal data and complete the required tables.				
<input checked="" type="checkbox"/> a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)				
<input type="checkbox"/> b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Modification Request and Modification Certification sheet found at www.ciwmr.ca.gov/LGCentral/Forms/nytmdrq.doc)				
<input type="checkbox"/> c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Modification Certification sheet found at www.ciwmr.ca.gov/LGCentral/Forms/nytmdrq.doc)				

8. In the table below, list the summarized diversion activities, and diversion data records that support your claim and are available for Board audit. Note: The Board expects the jurisdictions to be able to provide all back-up documentation, if requested. Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition calculations). If any diversion is from restricted wastes, agricultural wastes, inert solids [e.g., concrete, asphalt, dirt,] white goods, and scrap metal, please identify those programs/waste types and fill out Section 10. Please mark as Attachment 8 all copies of survey forms.

*Please provide detailed Non-Residential waste information in Section 9.

Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details substantiating your claim.

Industrial		Cardboard	35			35	0.1%	paper report
Commercial		Cardboard	20			20	0.0%	paper report
Commercial		Cardboard	9			9	0.0%	paper report
Totals			180	34448		34628	60.8%	

Also provide an attachment 9 which includes all of the generators surveyed. Include for each generator (use type of generator in lieu of specific business name) diversion activity and material type and associated tonnage for each diversion activity/material type, and applicable conversion factors/sources. Include copies of survey form(s) used.

Summarize the non-residential diversion activities for the top 10 generators quantification methodology, and applicable conversion factors and sources (e.g., cardboard recycling: quantified by monthly tonnage receipts provided by the contact person at the business).

The majority of all diversion items are from actual weight slips from the generator that are supplied in report form or from verbal confirmation with the generator. The commercial cardboard generators are from an average number of bails that have been generated over several years. The bails are considered to average 500 pounds each. The City of Colusa contacts all of the generators on an annual basis. The Wadham Energy Plant, the ash generator, weighs all ash shipped to their customers.

10. For each restricted waste type (i.e., agricultural waste, inert solids, [e.g. concreter, asphalt, dirt, etc.] scrap metals and white goods [PRC section 41781.2]) and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table.

Note: program name refers to one specific diversion program for that waste type (e.g., "Diversion conducted by city public waste dept.").

Restricted Waste Type	Specific Program Name	Year Started	Tonnage

b. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board - on a separate sheet marked "Attachment 10b", provide the documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (**Note:** this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2]). Please include documentation.
- That the jurisdiction is implementing, and will continue to implement, the diversion programs in its source reduction and recycling element.

Note: If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 10b for that waste type and program.

Instead please provide date of Board approval of previously submitted information.

(Date)

If documentation is not available, go to 10d.

c. If the diversion program started before January 1, 1990, and the documentation requested in 10b is available (but not yet approved by the Board), complete the table below for each program claimed:

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Diversion Tonnage
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	

d. If the diversion program started before January 1, 1990, and the documentation requested in 10b is not available, please complete the table below for each program claimed. **Note:** Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Tonnage	1990 Diversion Tonnage	Difference
